

SentimentWise Widgets — Sales Cheat Sheet

Background: What to Know Before You Sell

Data source	Licensed X (Twitter) — not scraped, not aggregated.
Refresh cadence	Every 1 minute — real-time, not end-of-day
Coverage	Global equities, ETFs, futures, forex, crypto — per asset class, never mixed
Proof point	Heatmap widget is live in the Fidelity mobile app — their highest-engagement widget
Score formats	Raw numeric (e.g. 4.18), normalized (90), or English labels ("Extremely Positive"). Can be customized to the buyer.
Delivery	Widgets (now) · API (coming soon) · Data Feeds powered by Context Analytics
White label	Yes — widgets can be fully white-labeled
Languages	AI summaries in any language; Social posts ingested in English, Japanese, Portuguese

The One-Line Pitch

Licensed social sentiment data, refreshing every minute, embedded directly in your platform.

Widget	Page	One-liner
Social Sentiment Movers	Discovery / Home	"Surfaces trade ideas before they hit the news"
Market Sentiment Heatmap	Discovery / Home	"Intuitive view of real-time stock momentum"
Social Sentiment Trend	Asset / Security	"The historical sentiment trend on any stock"
Sentiment Score & AI Summary	Asset / Security	"The what and why, updated every minute"

Lead-With Talking Points

1. **Licensed, not scraped** — most competitors can't say this about X/Twitter data
 2. **1-minute refresh** — users see sentiment shift before it affects price
 3. **Live in Fidelity** — their highest-engagement widget; this is proven in production
 4. **Per asset class** — no mixed feeds, clean signals
 5. **Fully customizable** — score format, universe, language, scoring ranges, UI match
-

The 4 Widgets at a Glance

1. Social Sentiment Movers

- **What it is:** Top 10 most positive & most negative stocks by social sentiment, right now.
- **What it shows:**
 - Social sentiment score (client's choice of format)
 - Relative tweet volume (z-score vs. baseline)
 - Raw tweet count
 - Dispersion (% of tweets from unique accounts — flags spam)
- **Best for:** Discovery / home page. Users find stocks they never would have looked at.
- **Key sell:** *"Your users will discover stocks they never would have looked at — before it hits the news."*

Social Sentiment Movers
Discover stocks ranked by real-time X social sentiment.

Top Sentiment Bottom Sentiment

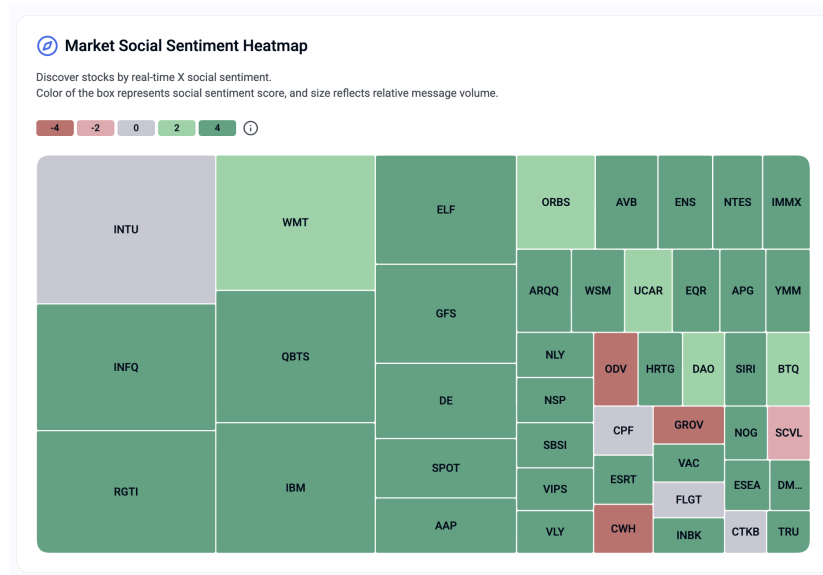

Symbol	Name	Social Sentiment	Rel Tweet Volume	Tweet Volume	Dispersion
KURA	Kura Oncology, Inc.	4.19	3.19	25	0.52
IBM	International Business Machines...	4.13	4.12	234	0.71
AAP	Advance Auto Parts Inc.	4.12	3.95	47	0.72
WSM	Williams-Sonoma Inc.	4.12	4.06	18	0.83
INFQ	Inflfection Inc.	4.11	4.05	275	0.61
ARQQ	Arqit Quantum Inc.	4.09	4.03	19	0.74
LGHL	Lion Group Holding Ltd.	4.08	2.83	20	0.10
WMS	Advanced Drainage Systems, Inc.	4.05	3.28	13	0.85
ELF	e.l.f. Beauty, Inc.	4.03	3.86	143	0.61
URBN	Urban Outfitters Inc.	4.00	3.43	25	0.80

As at May 21, 11:05 CDT Social Sentiment Descending, Tweet Volume > 12

2. Market Social Sentiment Heatmap

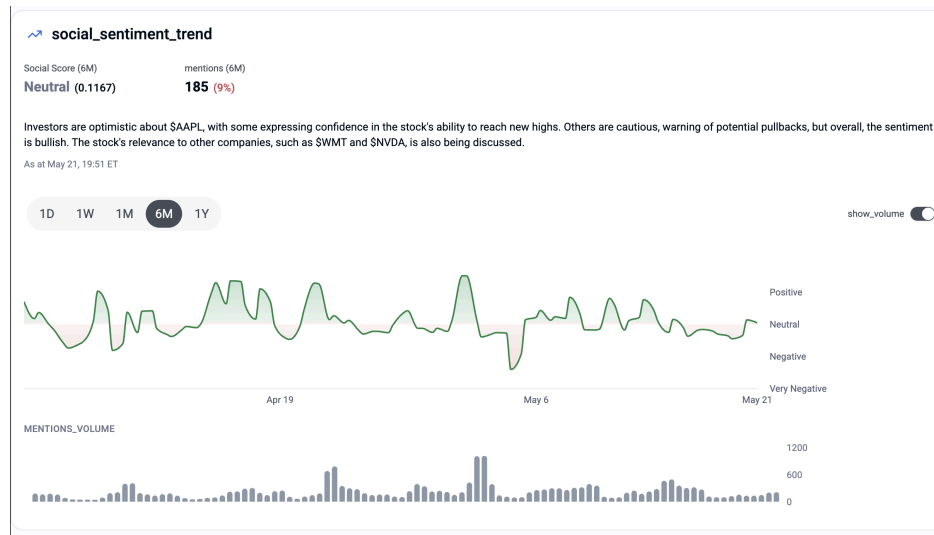

- **What it is:** Visual market-level map — box size = tweet volume, box color = sentiment.
- **Two versions:**
 - Market-level (full universe)
 - Portfolio/watchlist-level
- **Click-through:** Tapping a box navigates to the asset page → natural handoff to the Trend widget.

- **Best for:** Discovery / home page. High visual engagement, drives exploration.
- **Key sell:** *"One glance tells your users where the market's attention is right now."*

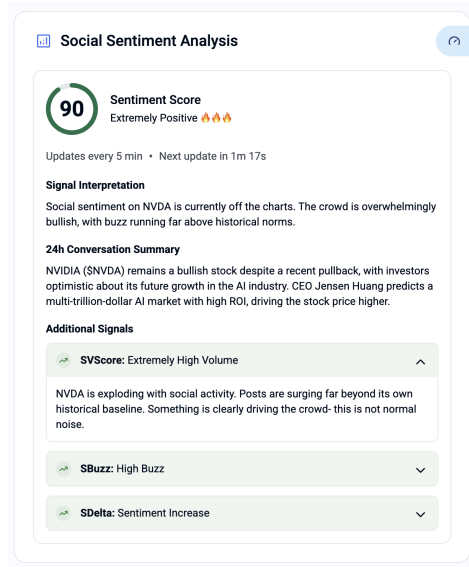

3. Social Sentiment Trend

- **What it is:** Security-level deep dive — sentiment history, volume, and AI summary on one asset page.
- **What it shows:**
 - Real-time sentiment score + raw tweet count
 - Historical chart (30d, 6m, 1y look-back periods)
 - AI summary of what's driving sentiment
- **Use cases:**
 - Already hold the asset? Validate news, decide to hold/add/reduce
 - Research phase? Compare historical sentiment to price movements
 - Spotted on Movers or Heatmap? Get the full story
- **Best for:** Asset / security page. The deep dive.

4. Sentiment Score & AI Summary

- **What it is:** Current numeric score + a live AI explanation of what's driving it.
- **Key points:**
 - Quick-glance, high-engagement surface (pairs with the Trend widget)
 - AI summary regenerates with fresh data — not a canned description
 - Score display: English, numeric, or emojis — fully customizable
- **Best for:** Asset / security page. The "what and why right now."
- **Key sell:** "Score + Summary gives the 'what and why right now.' Trend gives the history. Together they cover the full asset-page sentiment story."

Customization Angles (Use to Tailor the Demo)

- **Score display** — raw numeric, adjustable scales, symbols, emoticons — match their UI
- **Universe** — Russell 3000, S&P 500, top 100, or client-defined custom watchlist
- **AI summaries** — available in any language
- **Coverage** — Global equities, ETFs, crypto, forex, futures, private companies — always separate, never mixed feeds
- **Internal security ID mapping** — maps to client's own ticker/security IDs

Objection Handling

Objection	Response
"How do you filter bots/spam?"	Our Account Rating Algorithm flags low-unique-account tweet clusters. Custom volume thresholds remove low-signal tickers where one tweet skews sentiment.
"We only need one widget."	Start with the one that fits your highest-traffic page. Movers on the home page are the fastest win — it's what drove Fidelity's top engagement. The others can follow.
"What strategy is this best for?"	The 1-min refresh is especially valuable for short-term signals and has demonstrated strong predictive power for any strategy where social attention precedes price movement — momentum, event-driven, retail-flow monitoring.
"We build our own."	Building and maintaining licensed social data infrastructure is expensive and slow. This is plug-and-play, white-labeled, and already proven at scale with Fidelity.
"Is it compliant?"	Data is fully licensed from X — not scraped. Raise specifics with your compliance team and we'll provide documentation.
